10

CHAPTER 332-M

11

PROHIBITING GENITAL GENDER REASSIGNMENT SURGERY ON MINORS

12

332-M:1 Purpose.

13

14 I. The legislature finds that the following facts and circumstances exist, which make the  
15 enactment of this statute necessary for the protection of minors and the furtherance of the public  
16 interest:

16

(a) Physicians have an ethical and legal duty to obtain patients' informed consent before  
17 ordering testing and treatment.

18

(b) Older children and adolescents should be asked to provide their assent for treatment  
19 in addition to their parents' permission.

20

(c) A patient's informed consent requires adequate information, capacity to decide, and  
21 absence of coercion.

22

(d) Best practices urge shared decision making between parent(s) and child and, in  
23 general preferring alternatives that will not foreclose important future choices by the adolescent and  
24 the adult the patient will become.

25

(e) Multivariate analyses of published studies between 2015 and 2022 showed no  
26 decrease in suicidality after gender affirming surgery, with some studies showing a significant  
27 increase in psychiatric hospitalizations and suicide after surgical transition.

28

(f) There is a lack of high quality clinical trials which provide data on outcomes for  
29 adolescent genital gender reassignment surgeries or young adult genital gender reassignment  
30 surgeries, particularly after pubertal suppression and cross sex hormones.

**Amendment to HB 619-FN**  
**- Page 2 -**

1           II. Adolescent genital gender reassignment surgery generally lacks both adequate  
2 information for informed consent and involves a high risk of coercion for parental consent when  
3 parents believe that they are faced with a choice between their child committing suicide or  
4 consenting to their child's genital gender reassignment surgeries.

5           III. In the absence of high quality data to prove safety and efficacy, including long term  
6 outcomes, only people over the age of majority should receive genital gender reassignment surgery in  
7 the state of New Hampshire.
